95	95	100	18-25	35	2880-4000

Light Source: COB  
IP: 42  
Life Span: 5 years  
Input Voltage: 220v  
Driver Type: Isolated

- 1 Heat Sink
- 2 COB
- 3 Reflector
- 4 dark Body
- 5 Trimless Frame

## Recessed-Trimless

### **(Downlight)**

Nowadays using downlights is very popular in any types of buildings with any applications; however, trimless Motion downlight products bring about unique features for designers. These products with the light source recessed back into the body of the fixture are much better at controlling the spread of light, as it doesn't come into your line of sight until you're directly underneath. In other words, it offers an almost total glare solution. Moreover, the frame is separate from the whole light and that makes the installation progress uncomplicated.

# Rectangular Downlight

Discover more

Downlights are versatile and functional solutions for lighting all types of spaces. Now they have become accessible in such a variety in shapes and sizes.

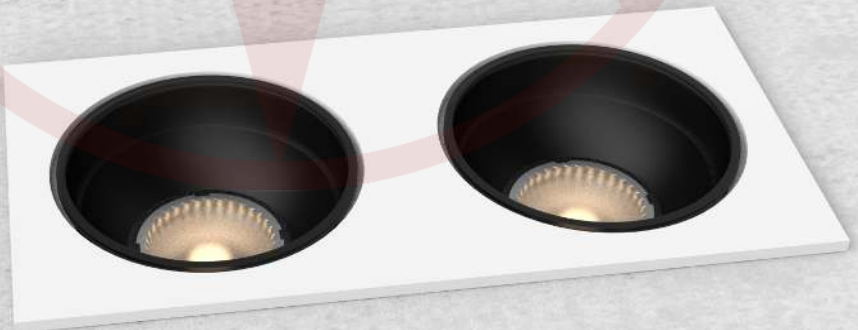

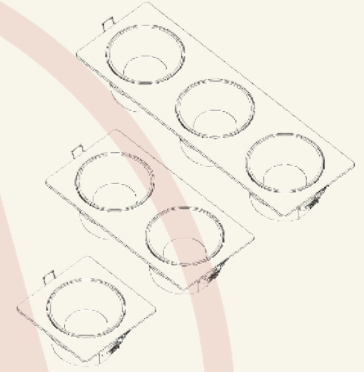

We are so pleased to have a great diversity of these lighting sources amongst our products and they are categorized in Motion Family with both trimless and flanged installation.

The flanged downlights are available in single, double or triple frames, meanwhile, different sorts of light sources such as GU10 and COB modules can be fixed inside them.

2x	75x145	14	35	1820
3x	75x 240	21	35	2730

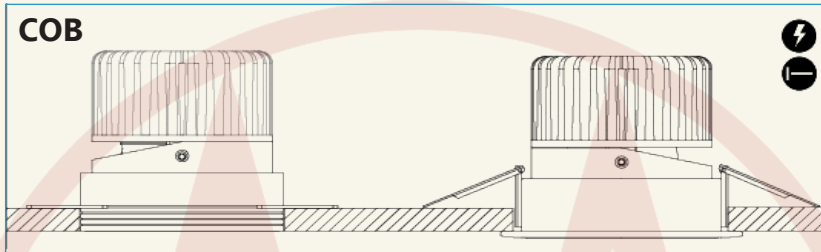

Module COB	Gap	Power	Beam angle	Flux(lm)
1x	75 x 75	12	24	1920
2x	75 x145	24	24	3840
3x	75 x 24	36	24	5760

Light Source: GU10, MR16, COB Module  
Life Span: 2 years  
Input volage 220v

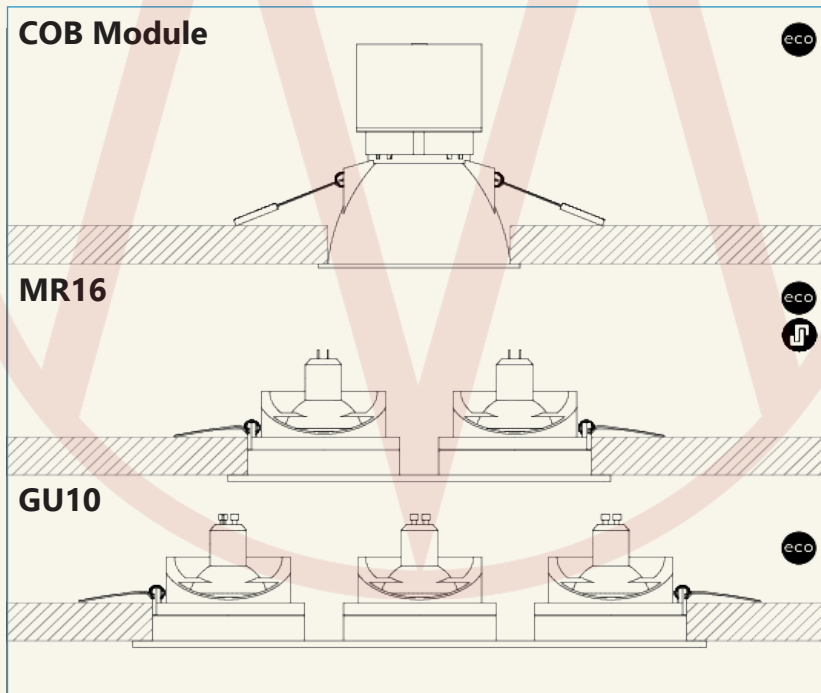

## GU10, MR16, COB & COB Module

Modular Pro Downlights are categorized in professional and economical series and they are perfect for managing general or accent lighting with the possibility of working on ceilings at different heights, with light beams of different widths and intensity. The first group is ideal for those who are looking for a light with the most efficiency and the second one meets the needs of clients whose demands are more affordable products with good quality. The available variety of products and range of accessories allow creating solutions for all project needs.

Professional Downlights are available in trimless and flanges recessed models, both in three different diameters: 55mm, 75mm, and 95mm,

Economical models have round or rectangular forms and enable the clients to opt for single, double or triple frames with GU10 LEDs available in the markets or choose from our COB modules, which can be installed instead of GU10 LEDs, to experience higher powers and quality.
